### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The closest prior art appears to be WO 02/07599 to Takinami et al. which discloses executing a control to maintain a negative pressure in a lancing apparatus within a specific range, US Pat. NO. 4,600,403 to Wagner, which discloses using a contact rod for detecting skin height. The prior art does not however disclose or fairly suggest "a controller that is configured to execute a control so as to maintain a pressure inside the cylindrical portion within a specific range, after the height detector has detected that the skin has been raised to the predetermined height, the controller being configured to define the specific range by granting a specific tolerance to a reference pressure; wherein the controller is configured to set the reference pressure based on the pressure detected by the pressure detector at a time that the height detector has detected that the skin has been raised to the predetermined height" or corresponding language found in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
